

SOLOMON MUOGHARA

Full Stack Software Engineer

Email: nerdsolomon@gmail.com | GitHub: github.com/nerdsolomon | Portfolio: nerdsolomon.github.io/portfolio

PROFESSIONAL SUMMARY

Full Stack Software Engineer with experience building scalable web and mobile applications using React, Django, Flask, Node.js, and Flutter. Strong background in API development, database design, and AI-integrated systems. Passionate about clean architecture, performance optimization, and shipping production-ready solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript, Dart, SQL, Java, C

Frontend: React, Tailwind CSS, HTML5, CSS3

Backend: Django, Flask, Express.js, Node.js, Spring Boot

Mobile: Flutter

Databases: PostgreSQL, MySQL, SQLite, MongoDB

Tools: Git, REST APIs, PowerBI, Linux, CLI

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer

APTECH Learning – Chevron | Sept 2024 – Present

- Deliver hands-on training in full-stack web and mobile development (React, Django, Flutter).
- Design and review real-world capstone projects simulating production environments.
- Mentor students in software architecture, debugging, and Git workflows.
- Improved student project deployment success rate through structured code reviews.

Full Stack Software Engineer

Tunjio Labs – Remote | April 2025 – Nov 2025

- Built LLM-powered personalized assistant integrating contextual user data.
- Developed responsive front-end interfaces using React and Tailwind.
- Designed RESTful APIs for scalable feature deployment.
- Collaborated remotely in agile product development cycles.

PROJECTS

RentRight Web Application

React + Django + SQLite

- Built a rental property management platform with authentication and CRUD operations.
- Designed REST APIs for tenant-property relationships.
- Implemented responsive UI with optimized page load performance.

E-learning Platform

Flask-based CBT and file management system

- Developed authentication, test engine, and automated result generation.
- Implemented file upload/download module with secure access control.

Search Server

- Engineered string-query search system capable of processing 1M+ lines in under 0.15s.
- Optimized time complexity for performance efficiency.

EDUCATION

B.Sc. Computer Science (Hons)

National Open University of Nigeria | 2024
