EDUCATION AND CERTIFICATIONS

Bachelor Of Science (HONORS) - Computer Science National Open University of Nigeria	January 2020 - February 2024
Nanodegree - ALX-T Data Analyst. Udacity/ALX	July 2022 – September 2022
Nanodegree - AWS Machine Learning Foundation 2022. Udacity/AWS	July 2022 – September 2022

SKILLS SUMMARY

- **Languages** : Python, C, Java, Dart, SQL, JavaScript, HTML, CSS
- **Databases and Management Systems** : Postgres, MongoDB, SQLAlchemy, SQL Server
- **Frameworks** : Flask, Django, React, Flutter, Express.js, Nodejs, Web2py, Spring Boot
- **Libraries** : Pandas, Numpy, Matplotlib, Seaborn, BS4, Sci-kit Learn, Pygame, Tkinter, TensorFlow
- **Tools** : Bootstrap, Tailwind, PowerBi, Tableau, Matplotlib, Git, Restful API

WORK EXPERIENCE

FULL STACK SOFTWARE ENGINEER APTECH LEARNING	September 2024 - Present
• Deliver hands-on training and projects in full-stack web and mobile development using React, Django, Flask, and Flutter. • Teach algorithm design and backend/frontend development with Python, Java, JavaScript, Dart, and C. • Mentor students on best practices in software architecture, debugging, and version control.	
FULL STACK SOFTWARE ENGINEER TUNJIO LABS	April 2025 – November 2025
• Built LLM-powered personalized user assistants using prompt engineering and user-context modeling. • Developed the company's portfolio website and built responsive front-end interfaces using React and Tailwind CSS • Collaborated remotely with product and engineering teams to deliver scalable features.	
TECHNICIAN CALLISTRIO ICT ENGINEERING	May 2023 - October 2023
• Installed and maintained CCTV, networking, and fire emergency systems. • Performed system configuration, upgrades, and preventive maintenance.	
PRIVATE PROGRAMMING TUTOR FREELANCE	December 2022 - April 2023
• Deliver hands-on training and projects in full-stack web development using Python and Java. (Flask, Django, Spring Boot)	
DATA ANALYST AND SCIENTIST FREELANCE	September 2022 – Sept. 2024
• Collaborating with researchers, and bankers in data generation, cleaning and standardization. • Participating in bounty programs in a race to help companies solve problems on their software and uncover loopholes	
SOFTWARE AND WEBSITE DEVELOPER FREELANCE	May 2021 - June 2026
• Collaborated with developers in quality assurance tests at Careersome job search application. • Performing codebase audit and refactoring for cvtocareers.com which helped improve and solved scaling issues. • Sole developing E-learning website for Treasure Stone Academic Private Schools.	

PROJECTS

Axterra Website - developed using React and Tailwind CSS for front-end, Express.js for backend, MongoDB for database.

Tunjio Website – developed the portfolio website for Tunjio Labs using React. <https://tunjio.com>

Jolly Podcast Mobile App - developed using Dart programming language for backend and Flutter framework for front-end

ChatBot - Using React and openai LLM to build personalized chatbot that uses user data, activities, to contextualize conversations.

Data Wrangling on TMDb Movies - Using Web Scraping to generate data from the TMDb Movies website to perform data analysis.

Search Server - I was able to develop a search server that can perform query search of strings with over a million lines under 0.15s.

MP3 Player - Using pygame and Tkinter to develop an mp3 player software that works with screen touch and selection navigation.

E-learning Website - Using Flask to develop an e-learning website that includes CBT, results printing, file upload and download.

MealOrdering Website – Using Flask to develop a website for restaurant menu setup and display, user registration, and meal ordering.
